

UV- stabilised Cable Ties

Designed for installation in areas where the cable tie will be subjected to high levels of UV exposure. Ideal for use in outdoor applications.

Made from UV- stabilised polyamide (PA66W), in accordance with ASTM standard D6779, with a higher carbon content. Making them resistant to UV radiation for considerably longer than standard PA66 cable ties

Specifications

UV- stabilised Cable Ties

Approx Size (mm)	Approx Size (Inches)	Min. Loop Tensile Strength Kg (lbs)
200x4.8	8x3/16"	22.2 (50)

Material	Colour	Flammability	Operating Temperature
UV Stabilised Polyamide 6.6	Black	UL94V-2	-40°C to +85°C
