Catenary Cable Installation ¹

MM (INS)

1. Place rubber grommets over MaxiLED cable

Make sure catenary cable is taught and secure. With the secure catenary cable above the MaxiLED cable, place a rubber grommet 20 mm (13/16 in) on both sides of the globe.

3. Repeat procedure

Repeat steps 1 and 2 until the entire strand is installed. Connect the installed strand to the transformer.

⚠ This product must be installed by a qualified electrician in accordance with all national and local electrical and construction codes. Failure to comply with the installation instructions can result in injury or death.

2. Secure MaxiLED cable

Using an appropriately sized UV resistant zip tie, secure the grommet against the catenary cable. **NOTE:** Ensure grommet is placed on the MaxiLED cable and not the catenary cable.

► Alternative installation method

Create a hoop effect. Ensure grommet is a minimum of 20 mm (13/16 in) from the globe where cables connect. Connect the installed strand to the transformer.
